A comparatively modest present,  
but the good ones which I can give.

"Only who knows his past has a future."  
Wilhelm von Humboldt (1767-1835)

## **Foreword**

This book contains the facts, who, where, when, but not the story of our family. If you can add to our history or have an anecdote to tell, then please share it and help make our story come alive. Even little things, like your cousin the fisherman who didn't eat fish, will make our story more personal. If you can add to our story, please contact me! I hope to have at least a photo of everyone who is here. It is amazing how often there is a close resemblance for relatives separated by generations.

## **Introduction**

The following pages list data for all known family members as of 22<sup>nd</sup> September 2020.

Each immediate family is presented in their own section that contains a graphical family tree as well as a description with information about each referenced person and their children. The child section provides information about the children of the preceding couple. When a child has offspring of their own this is presented in a separate family section for that child. In this case a '+' is used to denote that an individual will appear later in the book as a parent with his/her own children and there is a link to the appropriate family reference number. For children with partners but no offspring the partner data is given with the reference family. Roman numerals, followed by a period, are used to indicate the birth order.

In the chapter titled "Family of the Starting Person" the ancestors of Peter Sears are presented in a kind of enhanced Pedigree Chart which displays the graphic representation of their direct-line ancestors and the children of the couple. This chapter contains information about the couple whose relatives are listed in the later chapters.

The chapter titled "Families of his Ancestors" provides details (as known as of the publication date) for the relatives of Peter Sears. There is a chapter for each generation. Relatives are listed in the order of the nearness of their relationship.

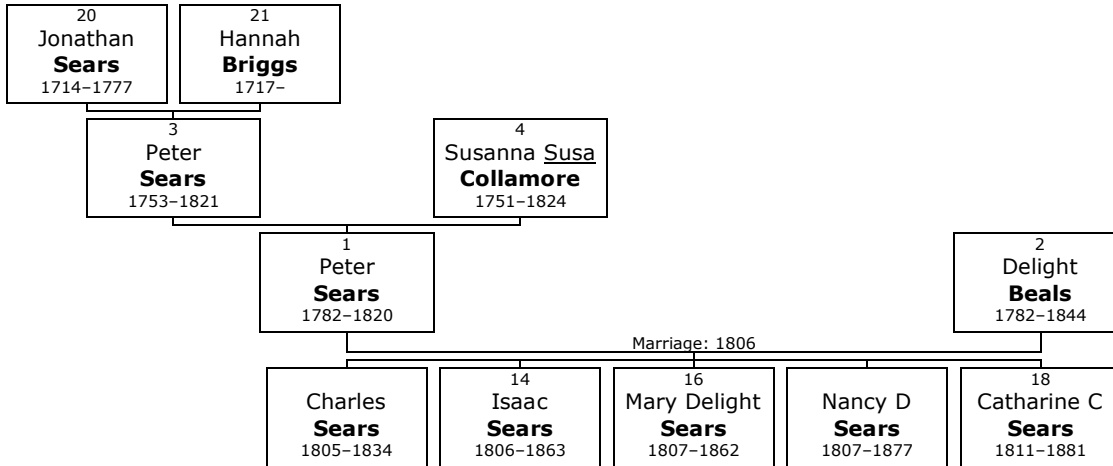

Sources for the information provided are given in the footnotes.

This document reports the details of 72 individuals, of whom 36 are male and 36 are female. Of the 37 individuals with recorded birth and death dates, the average lifespan was 55.62 years. Of these, 17 males averaged 55 years, and 20 females averaged 56.15 years. The longest living male was Alfred James Sears (1858–1945), who died aged 87. The longest living female was Myrtle A Sprague (1878–1968), who died aged 89.
